9. Reconnaissance

9.1. Procedure for registration

Before reconnaissance crews must fill in registration form (Appendix No. 8 of these SR) and submit it the latest at the date of the road book issuing.

Every crew will receive an identification card and driver/co-driver must submit 1-1 pc of photos on it. This card must be in the recce car during whole reconnaissance and during rally must be visible through the right rear window.

In case of the co-driver changing (after registration) the crew gets new identification card during Administrative check.

Every crew will receive also „PÁLYABEJÁRÁS” (RECCE) sticker with its competing number which must be affixed in right upper part of the windscreen during reconnaissance at all times. Missing sticker will mean failure of the reconnaissance rules. In the case, that sticker is damaged or in the case of the changing of the recce car, the crew must to ask for new sticker.

Competitors are required to carry their licences during reconnaissance and show them on the marshals demand.

9.2. Specific / national prescriptions – speed limits on SS

We emphasise to all entered competitors, that reconnaissance is not practice! All Hungarian traffic laws must be strictly adhered and the safety and all rights of other road users must be respected.

In the case of the infringement of the traffic rules during reconnaissance the Stewards will incur a penalty according RVSZ Appendix II. Art 6.6 prescription.

The maximum speed set for the reconnaissance of special stages is:

on SS1, SS2, SS3, SS5, SS6, SS8 - 70 km/h;

on SS4, SS7 - 50 km/h, except for those cases in which there are speed limit signals and in built-up areas.

All Crews are permitted a maximum of 3 passages over each special stage only in direction which is prescribed in the Road Book.

All reconnaissances of the rally route have to be done at reasonable speed in accordance to the traffic rules. Under no circumstances may competitors' drive in the opposite direction of the rally traffic on the stage roads, unless instructed by an official of the event.

The amount of the penalty is not affected by any fine imposed by the Police.

Other infringements or speeding during reconnaissance may be referred to the stewards.

Only series vehicles are possible for using during reconnaissance. It is forbidden to use competing car entered for rally.

Prescriptions for the recce cars:

- the exhaust shall be a series production exhaust with a maximum noise level within the permitted Hungarian noise level
- the safety rollbar is permitted in accordance with FIA Appendix „J” Art. 253.8.1 – 8.3.5
- 2 additional road-homologated headlamps are authorised
- the crew may use a "light" intercommunication system (without helmets)

Speed controls will be done by the Police with radar devices and speed-guns during the reconnaissance as well as during the rally. Hungarian law prohibits the fitting or carrying of radar blocking equipment.

9.3. Mounting of the speed control equipment (GPS)

RSB prescribe to use device for control of speed during reconnaissance.

The STS devices with accessories will be distributed during the Road Book issuing.

Reconnaissance cars must be fitted with 12V socket.

Appendix 2 – Reconnaissance schedule

1. Schedule of reconnaissance:

10 July 2015 Friday	08:30 – 18:00 all Special Stages
11 July 2015 Saturday	08:30 – 12:00 only SS3; SS4; SS5; SS6; SS7; SS8

It is strictly forbidden to recce at any other times.
Ceremony places only by foot without any restrictions.

2. Specific and/or national restrictions

Direction, passage limit and speed limit on the special stages:

1. Passage along the SS is permitted only in direction which is prescribed in the Road Book.

2. Number of SS passages during reconnaissance is limited on 3 passage.

3. The maximum speed limit for the reconnaissance of special stages is:

- on SS1, SS2, SS3, SS5, SS6, SS8 - 70 km/h,
- on SS4, SS7 - 50 km/h,

except for those cases in which there are speed limit signals and in built-up areas.

During registration, each crew will receive reconnaissance time card and identification sticker which must be affixed in right upper part of the windscreen during reconnaissance at all times. Any missing sticker will mean failure of the reconnaissance rules. In the sticker is damaged or in the case of the changing of the reconnaissance car, the crew need to ask for new sticker. Reconnaissance with unmarked or another car as was noticed will be penalised by Clerk of the Course or the Stewards.

Each crew must stop at Start of each SS and record the pass by marshal and also stop on marshal's instruction within SS during reconnaissance. Not stopping or not giving the reconnaissance time card to marshals to record the pass will mean failure of the reconnaissance rules. In case there are no marshals (officer wearing orange jacket) on Start of SS, crew can continue in its pass through SS.

Not recording of pass has no effect on allowed passes of SS.

Any infringements against reconnaissance rules described in the Art. 9 (other than speeding) will be penalised by the Clerk of the course or the Stewards.

3. Using of the speed control equipment (GPS):

In a first time, all competitors have to install the safety tracking system (GPS unit) in their registered recce car and it has to remain connected to 12V socket during the whole duration of the reconnaissance. GPS unit must positioned at the top of the front window at the right. Recce cars without installed STS will not be allowed on the stages for reconnaissance. Any infringement concerning the use of the tracking system during the reconnaissance will be reported by the Clerk of the Course and will be penalized by the Stewards.

Safety Tracking System - GPS unit with accesories (installer kit):

- **GPS unit**
- **magnetic antenna**
- **2pieces hose clamps**
- **suction mount**
- **12V cigarette lighter power cable**

Operation of GPS unit during recce:

- connected to 12V: beeps long time, red LED lights
- disconnected from 12V: beeps 5 times, LED did not lights
- speed limit warning (continous speeding for 10 seconds over the set value of SS): continuous beeps for 3 seconds

This feature can be turned off with the switch on the device.

4. Organizer limits usable tyres during recce:

These type of tyres are not be used during recce:

- homologated commercial winter or M+S tyre NOT allowed
- homologated commercial summer tyre with cutting NOT allowed
- any gravel racing tyre NOT allowed

Cut up of ads or changing of their shape is prohibited!
Stickers can be placed only as shown!
In the immediate vicinity of the starting numbers can be placed only organiser's ads!

Appendix 5 – Extracts from FIA Appendix "L"

EXTRACTS FROM FIA APPENDIX „L” RELATING TO OVERALLS, HELMETS AND ANY OTHER SAFETY REQUIREMENTS

1. Helmets

1.1 Standards

All drivers competing in circuit events, hill-climbs or rally special stages, entered on the FIA Calendar, must wear crash helmets homologated to one of the standards listed in FIA Technical List N° 25.

Helmets homologated to the FIA Standard 8860 - Advanced Helmet Test Specification (Technical List N°33), must be worn by drivers in:

- the Formula One World Championship,
- the FIA World Rally Championship, if listed as priority 1 or 2,
- the WTCC,
- the FIA GT1 World Championship,
- the FIA GT3 European Championship,
- the FIA F2 Championship
- the international series for GP2, LMP1, LMP2, GP3 and F3 cars.

All drivers taking part in the FIA Formula One World Championship must use the 2011 F1 Visor Reinforcement Panel for FIA 8860 Helmets.

It is strongly recommended that all drivers in the World Rally Championship and in those international series for which the technical regulations include crash structure requirements from the FIA Formula One, F3 or F3000 technical regulations wear helmets homologated to the FIA Standard 8860.

1.2 Conditions of use

Drivers of open cockpit cars must wear full-face helmets, of which the chin bar is an integral part of the helmet structure recommended for historic open cockpit cars and Autocross SuperBuggy, Buggy1600 and Junior Buggy.

Drivers and Co-Drivers in closed cockpit cars who wear full-face helmets must be able to pass the following test (1), in order to ensure that appropriate access to the airway of an injured driver is possible:

- the driver is to be seated in his car, with helmet and FIA-approved head restraint in place and attached and safety harness buckled.
- with the help of two rescuers, the chief medical officer of the Event (or, if present, the FIA medical delegate), must be able to remove the helmet with the driver's head maintained permanently in a neutral position.

If this is impossible, the driver will be required to wear an open-face helmet.

(1) *for historic cars, compliance is recommended.*

1.3 Modifications

No helmet may be modified from its specification as manufactured, except in compliance with instructions approved by the manufacturer and one of the FIA-listed standards organisations, which certified the model concerned. Any other modification will render the helmet unacceptable for the requirements of the present Article.

1.4 Maximum weight and communications systems

- Helmet weights may be checked at any time during an event and must not exceed 1800 g for a full-face type or 1600 g for an open-face type, including all accessories and attachments.
- Helmet-mounted radio speakers are prohibited in all circuit and hill-climb events (earplug-type transducers are allowed). Applications for waivers, on medical grounds only, may be made through the driver's ASN's Medical Commission. The fitting of microphones may be done only in respect of Article 1.3 above.

1.5 Decoration

Paint can react with helmet shell material and affect its protective capacity; therefore, where a manufacturer provides guidelines or restrictions on the painting or decoration of helmets, these must be followed, using only paint specified by them (air drying acrylic, polyurethane enamel or others) and preferably a painter having their approval. This is particularly important for injection-moulded shells, which are not usually suitable for painting.

The shell being painted should be efficiently masked, as paint penetrating the interior can affect the performance of the helmet liner.

Paints requiring heat curing should not be used and any process should not exceed the maximum temperature of conditioning of the helmet in the standard to which it is approved.

The manufacturer's instructions should also be consulted for any considerations on the use of stickers and transfers.

2. Flame-resistant clothing

In circuit events, hill-climbs, special stages of rallies and selective sections of cross-country events entered on the International Sporting Calendar, all drivers and co-drivers must wear overalls as well as gloves (optional for co-drivers), long underwear, a balaclava, socks and shoes homologated to the FIA 8856-2000 standard (Technical List N°27).

Users must ensure that garments are not too tight, as this reduces the level of protection.

Embroidery sewn directly onto the overalls shall be stitched onto the outermost layer only, for better heat insulation. Backing material of badges and thread used for affixing them to the overalls must be flameproof (see Appendix 1 of the FIA 8856-2000 Standard for detailed requirements and instructions for use).

Drivers of single-seater cars in races with standing starts must wear gloves in a high-visibility colour which contrasts with the predominant colour of the car, so that the driver can clearly draw the attention of the race starter in case of difficulties.

Substances, which may circulate in any cooling system worn by a driver, are restricted to water, or air at atmospheric pressure. Water systems must not require the saturation of a garment in order to function.

For events taking place in extreme heat, it is recommended that a cooling system be used (connected, for example, to the underwear designed for that purpose and homologated according to the FIA 8856-2000 standard).

Exceptionally, driver cooling vests, which are not FIA-homologated, may be worn but shall be in addition to the mandatory homologated underwear. They must include a base garment certified and labelled to ISO 15025; any tubing must be certified and labelled to ISO 17493 and must not be in contact with the driver's skin, and any connection to an on-board system must comply with Art 5.8.6 of the FIA 8856-2000 standard.

3. Frontal Head Restraint (FHR)

3.1 The wearing in an international event of any device intended to protect the head or neck and attached to the helmet is prohibited, unless the device has been homologated according to the FIA 8858 standard. Homologated FHR systems are listed in the FIA Technical List N° 29.

FIA-approved FHR systems must be worn by drivers in all International Events.

The following additional provisions apply:

The wearing of a FIA-approved FHR system is:

- a) Mandatory for Formula 1 cars of period G and onwards where the construction of the vehicle makes it practical to do so; recommended for other historic cars;
- b) Mandatory, in off-road, for all FIA European Championship events except for Autocross SuperBuggy, Buggy1600 and JuniorBuggy for which it is strongly recommended, with compatible helmets;
- c) not mandatory for the following categories of alternative energy vehicles: I, III, IIIA, IV, V Electric Karts, VII and VIII;
